and entertainment. The company's commitment to making a positive impact on the world started with its founder, Charles Adams, who put people first. This dedication is demonstrated in the company's ongoing commitment to community service and philanthropy, and to solving some of the world's most pressing challenges. Based in San Francisco, the company's portfolio

includes Autodesk Architecture, Engineering & Construction, Design & Making, and Entertainment & Media software. Most exciting is the partnership with General Electric and the investment in making next-generation solutions to address the world's most pressing challenges. From saving lives to enriching work, and powering the economy to improving the environment, we are working side-by-side with our customers to solve their most pressing challenges. Our customers range from small businesses, schools and universities to some of the largest corporations, government agencies and not-for-profit organizations. What is the impact you're making? The company's employees are leaders in addressing the world's most pressing challenges—with investments in a wide range of societal issues, including: Education Our commitment to education is key to bringing a better, more vibrant future for our children. We want every child to have access to quality education, regardless of their background. We're working to raise the bar of global education by supporting schools and learning centers around the world, and by supporting our customers in their own local communities. We are committed to supporting small and large schools, as well as specialized centers and community learning centers. To date, Autodesk has invested over $115 million supporting education in the U.S., Mexico, Canada, Central America and Asia. Energy We believe in using the power of technology to provide more energy resources to people and to promote energy efficiency. We also recognize that traditional energy sources are not sustainable and do not scale in a global economy. The last decade has seen a rapidly increasing number of major shifts in the industry that have transformed energy. Renewables have proliferated, and electric cars have begun to replace fossil fuel-powered vehicles. In response, the U.S. Energy Information Administration (EIA) recently forecasted that the nation's electrical generation will increase by 44 percent by 2035. We're supporting our customers in their work to address energy challenges by providing solutions that make a difference and reduce costs. Health We all know that improving our health 82157476af
