### About This Game

Endless Burst is a fresh take on the Bullet Hell arcade experience. Challenge your skills and endurance as you fight and dodge your way through overwhelming foes.

Customize the way you play with 9 unique and upgradeable classes. Unlock new powerful attacks and challenges as you progress. Procedurally generated enemies, levels, and bosses keep the experience fresh as every new battle is a unique challenge.

Select from 9 upgradeable classes, each with a unique play style. Whether you prefer to get up close and personal, snipe your enemies from a distance, or focus on moving around the hail of bullets, there's a class to suit your play style. As you progress, upgrade them to make them stronger, faster, and unlock devastating special attacks.

Three game modes are available. The default Mission Mode pits you in large room-based dungeons for you to explore, loot, and hunt the boss. Completing each level is challenging, but securing a victory will reward you with extra rewards and even more formidable foes. Boss Rush allows you to fight progressively more difficult bosses so you can hone your skills in those one-on-one duels. Finally the Custom Challenge mode allows you to face exactly what you want and how you want. On top of choosing the difficulty and size of the level, you can add gameplay modifiers to increase the difficulty in various ways in exchange for better rewards.

**Minimum:**

**OS:** Windows 7 or later

**Processor:** Intel Core 2 duo @ 2.2GHz

**Memory:** 500 MB RAM

**Graphics:** GeForce GTX 460

**DirectX:** Version 9.0c

**Storage:** 300 MB available space

English

---

Very strange game almost more like *Zelda* than a bullet hell shooter. It's also a roguelike but it's just way too easy to die from one tiny mistake and have to start all over. The attack mechanics aren't very satisfying since you can't really aim where you shoot.

Cool graphics and atmosphere but it didn't hold my interest. Music is nice.. Average bullet hell shooter but without anything to really set it apart from better games. The warping effects are cool but no real character to any of the enemies or you for that matter. There's better stuff out there if you're looking for this type of game. 5/10
